Project Name	Project – Retail Store Stock Inventory Analytics

The screenshot shows the IBM Cognos Analytics with Watson web application. The browser address bar displays `us3.ca.analytics.ibm.com/bl/?perspective=home`. The main header includes a search bar and navigation icons. A central banner area contains the text "Hello. Welcome to Cognos Analytics with Watson." and two buttons: "Watch video" and "Take a product tour". Below the banner, a "Quick launch" section features four cards: "Upload data", "Prepare data", "Exploration", and "Present data". A notification bar at the top of the main content area shows "Analyzing Inventory Management Dataset.csv" with "Cancel" and "Details" options.

This screenshot shows the same IBM Cognos Analytics with Watson interface, but with a green notification bar at the top stating "Inventory Management Dataset.csv was uploaded successfully." with a "Hide Details" link. The rest of the interface, including the welcome message, product tour buttons, and quick launch cards, remains the same as in the previous screenshot.
